About

I'm an NMCT student at the Howest Kortrijk. I grew up from a small place called Wervik. I've always had a big interest in science and technology. I studied Chemical Engineering 1 year in Ghent, but noticed it was not my cup of tea. So I switched and learned how to program instead. The possibilities I had with programming really blew my mind, and with a thriving mobile development sector, I started creating my own apps to increase my knowledge about C#. In my second year I moved my focus to Backend programming with frameworks like ASP.NET. In the summer I discovered Arduino's and Raspberri Pi's, so started finding my way in the Maker community. In my final year of college I tried to look beyond the code, and picked up an interest for Information Security related topics. There I learned more about Linux systems.

Experience

Student work at bPost

Mailman

2012-2015

Internship at Televic

ASP.NET dev on Edumatic platform

2016

Education

Sint-Joris Menen

Applied Sciences

Graduated in 2012

HoGent

Chemical Engineering

2012-2013

HoWest

New Media and Communication Technology

2013-2016

Skills

Front-End

* HTML +++ * CSS ++ * JavaScript ++ * TypeScript ++

Back-End * ASP.NET MVC5 +++ * NodeJS + * PHP + * Flask +

Languages

* C# +++ * JavaScript ++ * Python ++ * Go + * Java + * PHP +

Languages

- Dutch +++
- English +++

Interests

- NetSec ++
- Windows App Development +++
 - Windows 8 ++
 - Windows Phone 8 +++
 - UWP/Windows 10 +++
- Linux ++
- Bots
 - MS Bot Framework +++
- IoT
 - Raspberry Pi +++
 - Arduino +++
 - Netduino ++
